

The background of the entire image is a close-up, high-resolution photograph of numerous ripe, red strawberries. The strawberries are densely packed, with their characteristic green leafy tops (calyxes) visible. The lighting is bright, highlighting the texture of the strawberry skins and the small seeds (achenes).

What is a Grower Training Course all about?

A Grower Training Course is a one day course that will teach you the importance of produce safety, as well as the skills needed to implement those practices on your farm.

Who should attend a Grower Training Course?

We encourage all produce growers to attend! The Grower Training Course also meets the Produce Safety Rule requirement that at least one supervisor or responsible party from the farm must successfully complete a food safety training recognized as adequate by the FDA.

What should I expect at a Grower Training Course?

A group of produce safety subject matter experts will present information on worker health, hygiene, and training, agricultural water, soil amendments, animals, sanitation, and required records related to your farm.
